GitHub: <https://github.com/Joselam97>

<Professional Profile/>

Advanced Computer Engineering student with knowledge in Java, SQL, HTML5, CSS, JavaScript and Python. Passionate about software development with hands-on experience in creating applications focused on solving real-world problems. I have worked on personal projects that include creating interactive applications, implementing advanced object-oriented programming concepts, and integrating management and control features for end-users.

<Technical Skills/>

- > Back-End: Java, Python, SQL
- > Front-End: HTML5, CSS, JavaScript
- > Databases: Oracle SQL, MySQL
- > Protocols and Communication: XML, JSON
- > Tools and Frameworks: Git/GitHub, Maven, Jakarta EE, Hibernate, JSF
- > IDEs: IntelliJ, Visual Studio Code

<Featured Projects/>

OnlineProducts (Java, SQL)

A Jakarta EE-based web application for managing products and categories. This project enables full CRUD operations on products and categories, with a responsive, PrimeFaces-styled interface for a modern and user-friendly experience.
